

The Kamar App

This can be used by students and parents/caregivers. (make sure you have your login and password for Kamar ready) You have access through it to see student attendance, timetable, details and results as well as view the daily notices and the calendar.

Install instructions for KAMAR Mobile Phone App -

- Download the KAMAR App on your iOS device from the iTunes store or on your Android device from the Google Play store.
- The first time you open the KAMAR App you will see the screen shown (or if you do not see this screen, select setting from top corner and then select default or + sign). Enter the server address as shown (or <https://kamar.ashcoll.school.nz/>) If the app doesn't work), your school Kamar username and password, select save and finally push the back button at the top left of the screen

Support for Push Notifications (a message that pops up on a mobile device)

This should automatically be set up; however you may need to register your Android device to receive push notifications. Then whenever the school sends out a text message, KAMAR will send it to you first as a push notification. If you don't view the notification, then it sends it as a text message.

Support for Absence Notifications

Parents/Caregivers will be able to use the app to advise the school on the day their child is absent.

Please note: this feature may need to be turned on in your Portal configuration!
